

Write a JavaScript program that utilizes for loops. The program takes a number as input and prints a pattern as follows:

```
const num = 5;

// Your solution here...

// ..

// ..
```

After running this code, the output should look like this:

```
54321
4321
321
21
1
```

Another example:

```
const num = 7;

// Your solution here...

// ..

// ..
```

After running this code, the output should look like this:

```
7654321
654321
54321
4321
321
21
1
```
